

# „6 digi\_tours of Europe”

Erasmus+ Action Type KA220-SCH - Cooperation partnerships in school education

The project "6 digi-tours of Europe" aims to create and test a course concept through the exemplary development of teaching and learning material in the field of film and social media with corresponding practical phases, which will increase the digital competence of the participants and reclassify digital media in the education system.

We see that the fascinating and intensely developed field of social media has gained momentum in recent years around the world and has become an integral part of everyday life.

As expected, this field has entered the job market strongly in recent years, bringing with it a number of professional offers. And because the thirst for knowledge is great and the desire to spend time together is a pleasure, we start the second "Social Media Crash Course" (online) offered by Asociación Cultural y Deportiva Un futuro con Europa Spain Andalucía Otura.

The online courses took place from 17-27.10.2022.

In a wonderful atmosphere, participants from Germany, Northern Macedonia, Spain, Italy, Turkey and Romania attended the social media promotion course developed by our Spanish partner in Granada, Spain, in the framework of the project "6 digi\_tours of Europe" on 12-18 November.

## Next step:

The second transnational meeting of the project, to be held in Italy, 7-10 December 2022. This will be the occasion to evaluate the results of the first year and the level of achievement of the project objectives. Planning for the second year.
